

ALL DECK COATING SYSTEM COVERAGE RATES

PRODUCT	SQUARE FEET PER GALLON*
Clear Sealer**	250
Laminating Resin	40 - 60
Textured Basecoat Kit***	100
Finish Resin	125 - 150
Fiberglass Mat	Entire Surface
Patching Compound	250
Caulking Compound	500

*Minimum Container Size is 1 Gallon, except for Patching & Caulking Compounds.

**Only used over lightweight concrete, delaminating plywood, or birdseed to bind surface together.

***Specify which type of aggregate bag (Spray or Roll) is needed when ordering Textured Basecoat Kit.

HOW TO COMPUTE ORDERS

FORMULA: Square footage of area being coated divided by the coverage rate of each product, equals the amount of material needed.

EXAMPLE

Deck Area - 100 square feet divided by:

50 (average coverage rate for Laminating Resin) =	2 Gallons
100 (coverage rate of Textured Basecoat Kit) =	1 Gallon Kit
125 (average coverage rate of Finish Resin) =	1 Gallon
250 (average coverage rate of Patching Compound on plywood) =	1 Quart
Total area plus 25 (to allow for waste of Fiberglass Mat) =	125 Square Feet

ORDER WOULD BE

2 Gallons Laminating Resin	1 Quart Patching Compound
1 Gallon Textured Basecoat	125 Square Feet Fiberglass Mat
1 Gallon Finish Resin	

HOW TO COMPUTE THE COST PER SQUARE FOOT

To figure the cost per square foot of the All Deck materials for a project: Divide the net cost of all materials used by the number of square feet being coated.

EXAMPLE: \$175.75 divided by 100 sq. ft. = \$1.76 per sq. ft. material cost.
